DETAILED ACTION

1. This office action is in response to the amendment received on May 4, 2007. The applicant has cancelled claims 2 and 4 and also amended independent claims 1 and 5 to include structural limitations not previously considered therefore claims 1, 3, 5 and 6 will be fully examined.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on December 20, 2006 is noted. The submission is in compliance with the provisions of 37 CFR 1.97 and 1.98. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 3, 5 and 6 are **Finally** rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The applicant amended the independent claims to include, "a planarity of 0.5 mm or less." The examiner is confused as to what the applicant is actually trying to disclose. Is this the entire surface of the wafer holder? Is the individual dimension formed at the top portion of the nubs?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3723

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3, 5 and 6 are **Finally** rejected under 35 U.S.C. 102(b) as being anticipated by Imai et al. (6245152). Imai et al. discloses a wafer holder (49) for semiconductor manufacturing equipment, the wafer holder having a wafer-carrying surface for carrying wafers, the wafer-carrying surface having a *planarity* of 0.5 mm or less depending on the size of wafer selected and comprising multiple nubs (43) formed thereon the wafer carrying surface, said nubs each having a flat portion whose surface area is 70 mm² or less per nub, wherein the total surface area of the flat portions of said multiple nubs is 40% or less of the surface area of wafers that the wafer holder carries (Column 12, Lines 13-25).

Response to Arguments

7. Applicant's arguments with respect to claims 1, 3, 5 and 6 have been considered but are moot in view of the new ground(s) of rejection. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3723

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
